

TOWNSHIP OF HAVERFORD

**Request for Proposals
Burmout Road and Glendale Road
Intersection Improvements**

**Addendum No. 8
November 2, 2022**

The purpose of this addendum is to respond to questions received regarding this project. Questions are marked in black; responses are marked in red.

1. Obviously, Pennoni has done a great deal of work on this effort already. Will they be eligible to bid or will their role be review and advisory (owner's rep)? **Pennoni is eligible to submit a proposal to design the project.**
2. With regard to the proposal preparation, the RFP reads "*Phase I, which involves tasks that can be completed prior to final direction with regard to the intersection improvements, will be the basis of award of this design consultant contract.*" Should we prepare a scope for *only* Phase I, since Phase II will be a separate contract? If we are submitting scopes for both, will Phase II include Construction Management/Construction Inspection (CM/CI) as part of the scope, or will CM/CI be conducted by another (Twp engineer, PennDOT, etc.)? **A scope for only Phase 1 is required at this time. CM/CI will not be conducted by the firm performing the design.**
3. The original budget estimate for this effort was ~\$92K for engineering and ~\$10K for environmental work. With the new project phasing, what is the anticipated budget for Phase I? I assume the budget for Phase II will be based, in part, on the selected design. **The budget/fee for Phase 1 should be consistent with the Phase 1 scope of work. Phase 2 budget/fee will be based on the selected final alignment.**
4. The MTF fund was originally for \$1M and the Township was contributing \$300K for a total budget of \$1.3M. Since the roundabout construction is estimated at \$1.7M, will Township be contributing more from capital funds if this solution is selected, or will the Township seek additional grants or funds? **The source of additional funding has not yet been identified.**
5. Regarding the Environmental Impact Evaluation, what specific tasks are anticipated for Phase 1? E.G. Is wetland delineation required; Is a T&E habitat assessment required; For the 6(f) and 4(f) limits, is anything more than coordination with DCNR required; Is a historic resource Survey Form required? **The Phase 1 environmental impact evaluation should include enough tasks and information to confirm that both identified alternatives are feasible.**
6. Can a map depicting ROW and boundaries between PennDOT, Haverford, the RHM Sewer Authority, and Marple Township be provided? **Existing mapping, (ie street maps, tax maps) is available through publicly accessible electronic means to all responders.**
7. Is it possible to extend the due date? **The due date will not be changed.**

END OF ADDENDUM
