

Parking Enforcement

The **Parking Enforcement Office** is under the direction of the Sergeant of the Special Operations Division and is responsible for all of the parking meter enforcement. The office is staffed by one secretary and four parking enforcement officers.

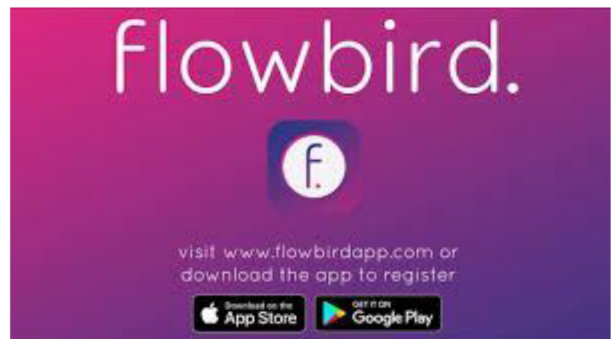

Throughout the township are 265 parking spaces. These spaces are controlled by meters located within five different municipal parking lots and curbside parking spaces at several different business districts. Kiosks control the Brookline and Oakmont municipal parking lots. These kiosks are solar powered and assist the Township in “going green” by reducing the electric costs. The meters are maintained and serviced by Parking Enforcement Officers, who are also responsible for the coin collection from these meters.

The meters throughout the Township can be paid by using coins or the Parking Card. The Parking Card will also allow the driver to retrieve any unused time on the meter and place it back on the card. Parking Cards can be purchased at the Haverford Township Police Department, Records Division. The kiosks can be paid with coin, bills, and credit cards.

In 2019, the Township introduced a mobile parking app, Flowbird that allows citizens to pay for parking via an electronic device. One of the features of Whoosh is that it allows citizens to purchase more time on a meter or kiosk without having to go back outside to their vehicle.

There were 3,386 parking tickets issued in 2019. Collections from meters totaled \$125,185.81. This amount was an increase from the 2018. The police department municipal parking lot sticker sales totaled \$17,895.00. Fines collected for parking violations totaled \$57,587.00 in 2019. There were 332 state citations issued for un-paid Township parking violations.
